The question of the cash ratio to be maintained by the Bank against demand liabilities is an important condition of the agreement of 1923, and this condition which is incorporated in the Revised Agreement, should not be overlooked.

Government Representation on the Board of Directors.—Government agree with the Committee. This question will also be referred to the Committee to be appointed in connection with the placing the constitution of the Bank on a statutory basis.

Extension of Banking Facilities.—Government agree with the Committee that though the need for opening new branches is not now very pressing, the general extension of banking facilities in the moffusil should be kept steadily in view. This suggestion of the Committee as well as that of the Director of Industries and Commerce regarding the conversion of certain sub-branches into branches and opening new sub-branches in certain places is commended for the consideration of the Bank.

Industrial Finance.—The arrangements proposed for industrial finance are of an important character and are reserved for separate consideration.

Government desire to convey their thanks to the Members of the Committee for their valuable sugggestions and to the representatives of the Bank in particular, for the spirit of co-operation with which they have approached and handled the whole question.
